

# Kapow Katalyst™ for SaaS Integration

Don't be limited by low-function connectors or custom integration code. Get self-service SaaS integration in minutes with Kapow Katalyst.

---

## Benefits

- Create SaaS integrations tailored to your organization's specific needs
  - Integrate applications even when no API exists
  - Deploy integrations across the organization as lightweight Kapplets
  - Increase agility with self-service integration
- 

## SaaS Application Integration

Choosing your SaaS application is just the start—you're now facing five complex application integration challenges:

- **Migrating your data** to your SaaS application
- **Customizing your application** to meet your needs
- **Integrating your applications** to avoid siloization
- **Securing your data** from unauthorized access
- **Protecting your investment** with an exit strategy

Why have customers around the world chosen Kapow Katalyst™ to take on these integration challenges? They use Katalyst because it works where others can't.

## Self-Service Integration With Kapow Katalyst

Any integration solution can access databases and APIs, but Kapow Katalyst offers much more. When you can't access a database, and there's no suitable API, Kapow Katalyst still gets the job done. Unlike other solutions, with Kapow Katalyst you create automated integration workflows that navigate through any application, entering data into form fields and extracting content from the application's web pages. Fast, reliable point-and-click development means self-service integration without consultants or coding—even when no APIs exist and databases are inaccessible.

## Migrating Your Data

Migrating to your new SaaS application can become a complex project involving expensive experts and custom scripting. How costly? One customer received a quote of \$40,000 just to migrate their on-premise CRM data to Salesforce CRM, wiping out years of expected savings. With Kapow Katalyst, the migration took only a single weekend—thanks to Katalyst's extreme productivity.

## Customizing Your Application

Most users tailor their SaaS implementations to their needs, and Kapow Katalyst supports customizations better than any other solution. Katalyst offers two ways to integrate with Salesforce. With Kapow Software's Plugin Generator for Salesforce you can connect any application to Salesforce.com or Force.com—with or without Visual Workflow. Or bring self-service integration to business users as a Kapow Kapplet™—a lightweight, instantly deployable end-user app that extends the power of Salesforce integrations to desktops and mobile devices.

## Solution Data Sheet

Kapow Katalyst™ for SaaS Integration

Figure 1.

- Integrate any of your applications and data without connectors, consultants, or coding.
- Deploy in any SaaS app or on any desktop as a Kapow Kapplet.
- No APIs? No problem. APIs are optional.

---

## Select Customer

### The Standard (Real-Time SaaS Integration).

As they began to adopt SaaS computing, The Standard found Kapow to be an indispensable partner. The Standard relies on Kapow Katalyst for real-time integration with Yodlee, a SaaS-based provider of personal finance solutions.

By using Kapow Katalyst to securely move data to Yodlee in real time, The Standard provides their customers with seamless access to Yodlee's products and services.

---

## Integrating Your Applications

During implementation and after launch you'll need to keep all your applications in sync, and Kapow Katalyst offers four options. You can integrate in real-time. You can deploy Kapplets for on-demand integration. An integrated scheduler can run any workflow on any schedule, and you can even invoke any integration—no matter how complex it may be—directly from Java or .NET apps, or expose them as REST or SOAP services. It's your choice.

## Securing Your Data

SaaS security isn't a worry with Katalyst. It honors all application security, making it easy to integrate your SaaS-based data into custom reports and dashboards for everyone on the team—there's no need to create separate integration rules for each user, giving you the ultimate in SaaS security and convenience. Katalyst also supports a full set of user, group, and role security, guarding against unauthorized access to the development environment.

## Protecting Your Investment

Let Katalyst be your exit strategy—switch SaaS vendors any time you wish and take all your data with you. Even when the vendor's API can't access all your data, you can get it with Katalyst. You're in complete control.

## Katalyst: For SaaS and Cloud Integration

Contact Kapow Software today to see how you can integrate applications that no one else can, without costly consultants. Keep your SaaS integration projects under control from start to finish with Kapow Software.
